EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Marina Cunningham on February 26, 2007.

The application has been amended as follows:

Claims 15 to 18 have been canceled as being drawn to an invention non-elected without traverse.

The following is an examiner's statement of reasons for allowance:

The claims are deemed allowable because the prior art does not teach or reasonably suggest a cylinder head arrangement for a piston compressor having a suction gas channel defined between a retainer element and a valve plate, wherein the suction gas channel is defined between the retainer element and the valve plate, and extends from a radial outer edge, relative to a piston reciprocation axis, of the valve plate and/or the retainer element to the suction opening such that gas enters the suction channel between the retainer element and the valve plate radially, relative to the piston reciprocation axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
